

(a) geographic map — where each speed-change point is

(c) point types

each numbered point is a state transition where the speed may change

point type	changes	boundary
 cell crossing	weather	0.5° cell (space)
 6 h block	weather	6 h line (time)
 heading change	course ψ	segment end
  start / arrival	—	port A / port B

(b) time--distance state space — same points; kink = speed change
